International Wire and Cable Trade Fair
Internationale Fachmesse Draht & Kabel
Düsseldorf, Germany | wire.de

International Tube and Pipe Trade Fair
Internationale Rohr-Fachmesse
Düsseldorf, Germany | tube.de

The Who's Who of the international wire, cable, tube & pipe industries in Düsseldorf: Who will be exhibiting in April 2024?

The sector looks to Düsseldorf with anticipation, where the global No. 1 trade fairs for the wire, cable, tube & pipe industries will be staged from 15 to 19 April 2024.

With immediate effect all exhibiting firms are live at www.wire-tradefair.com, Exhibitors & Products 2024 and www.tube-tradefair.com, Exhibitors & Products 2024 presenting their products and trends on the Internet portals.

In five months that time will have come and the industries will meet at Düsseldorf Exhibition Centre.

What makes it special: #Sustainability and #Energy Efficiency are even more in focus than in 2022. Daily ecoMetal trails touring the exhibition halls are aimed at convincing visitors of exhibitors' novel, clean production methods.

Trend forums, expert meetings and themed pavilions for stainless steel, hydrogen, other regenerative energy carriers, separating and cutting, plastic pipes & tubes and finished products for Fastener & Spring Making Technologies will be in focus.

Community building comes care of the daily After-Work Chill Meetings in the outdoor spaces and entrance Nord – here exhibitors can also meet their customers after trade fair hours over drinks and tasty Düsseldorf canapés.

Ranges on display at wire 2024

wire will be staged in exhibition halls 9 to 17 in 2024. It will be as big as ever, occupying some 66,900 square metres of exhibition space. With 1,026 exhibitors from 60 countries it will even surpass pre-pandemic levels.

On show will be machinery and equipment for the manufacture and processing of wire, finished products at Fasteners & Springs, tools and auxiliaries for process engineering, materials, glass fibre technologies, special wires and cable as well as innovations from sensor, control and testing technology.

In addition to wire and cable machinery producers, wire and cable products and glass fibre technologies, impressive wire mesh welding machines will be displayed in Hall 17. These pose logistics with particular challenges because thick cables have to be laid and connected in the supply ducts to transport the electric power this heavy machinery requires for its live operations.

Messe Düsseldorf

Fastener & Spring Making Technologies and their finished products in Hall 16

Here the complete value chain for fasteners and springs can be found: from raw materials, machinery and equipment to fasteners, connectors and industrial springs. This once again makes #wire Düsseldorf 2024 a highly topical information and order platform for the producers, dealers and buyers of screws, brackets, construction components and fittings, all types of springs and wire bending parts.

Ranges on display at Tube 2024

Tube also enjoys excellent booking levels. So far, 768 exhibitors from 49 countries have registered. They will

occupy a total of 49,600 square metres' exhibition space in Halls 1 to 7.1.

#Tube 2024 presents the entire process chain of the tube & pipe industry – in a focused and compact array: machinery and equipment for manufacturing pipes and tubes, finishing and processing of pipes & tubes as well as raw materials, plastic pipes, tube products and accessories, used machinery, tools for process engineering, auxiliaries, sensor technology, control, measuring and testing technology all form part of the extensive ranges. This line-up is complemented by tube & pipe, pipeline, OCTG technology and profile trading.

International satellites in booming markets of the future

Over a time span of almost 40 years wire and Tube Düsseldorf have developed into **the** leading trade fairs for their industries – now also "giving birth" to satellite events on the #Wire, #Cable and #Tubes & Pipes themes. In their regions, they are the market leaders and drivers for the local industries and boast high growth potential. Satellites in Turkey, Egypt, Mexico, China, Thailand and India now already form an integral part of the growing portfolio of the Metal and Flow Technologies *made by* Messe Düsseldorf.
